

# Pipeline Services

WOOD GROUP

Wood Group's full service pipeline group is a recognized industry leader as a reliable partner for providing the complete spectrum of pipeline services.

## Pipeline Engineering

Our pipeline engineering group has the expertise to manage and implement any part of a pipeline or associated facility. From concept through commissioning, we have the personnel to consistently deliver high-quality services.

Our engineering projects include:

- Gas and liquid transmission pipelines
- Terminals, storage and hub facilities
- Compressor and pump stations
- Well pads and gathering systems
- Pipeline and facilities construction
- Pipeline relocations
- Gas storage facilities
- Metering and regulation facilities

## Pipeline Field Services

Our field service experts have years of hands-on experience with knowledge of the latest industry techniques, standards and regulations. While we have the ability to support projects from conception through commissioning, we have the flexibility to provide only the services you need.

Our field services include:

- Environmental permitting
- Survey
- Mapping
- Construction management & inspection
- Land and right-of-way
- Geographic information systems (GIS)
- Integrity management
- Field logistics

## Pipeline Fabrication

We provide full service fabrication throughout the United States from drafting and design to welding and material tracking. We tailor to your fabrication needs with quality and safety being at the forefront. Our modern, fully equipped pipe fabrication shops are certified to do work according to ASME codes A, U, PP, S and R. With more than 200,000 sq. ft. of floor space, we remain competitive while delivering a quality product in a timely manner.

Our fabrication services include:

- ASME pressure vessels
- Separators, compressor bottles, filters, bladder tanks, dehydrators
- ASME and API pipe fabrication – carbon steel and specialty alloys
- Headers and manifolds
- Pig Launchers and receivers
- Pipe spools
- Nondestructive examination (NDE)
- Structural steel
- Pipe supports and racks
- Pipe bridges
- Equipment guards
- Platforms and handrails
- Skids and frames
- Pipe clamps
- OEM equipment
- Power pack skids
- Storage bins and hoppers
- Chemical piping
- Iron fabrication
- Boiler code piping
- Hydro-testing

## Pipeline Construction

We provide turnkey services through all phases of pipeline construction with the knowledge to build and deliver projects of any magnitude. Our enhanced construction service is bringing new methods, new technology and new services to give you a more efficient and cost effective service.

We provide support through the following services:

- Mainline
  - Carbon steel
  - HDPE
  - Flexsteel
- Gathering systems
- Distribution lines
- Well connects
- Hydro-Vac services
- Transport and trucking
- Pipeline relocations
- Integrity work
- Material procurement
- QA/QC management
- Line locating
- HDD boring

## Safety and Assurance

We passionately care about the safety of our clients and behave as safety leaders. We are committed to preventing injuries and ill health to our clients, our people, and those we work with so everyone returns home safely.
