

A flexible
execution model
to meet customer needs.

A focused team
generating significant
reductions
with repair orders

360° Repair Orders.

Our complete service offers you:

- A multi-discipline team
- A fast turnaround production line
- An integrated workflow process
- A low cost solution

360@woodgroup.com

Wood Group 360° Repair Orders.

Core service brochure.

Using a handpicked multiskilled team we are delivering major improvements in efficiency.

Total clarity.
Maximum efficiency.
No surprises.

Key benefits:

- Fixed price, low-cost pay-as-you-go service
- Prioritised delivery of engineering and fabrication
- Rapid set up following approval
- No more high cost surveyors
- Multi discipline personnel ready for quick deployment
- Innovative survey techniques
- Integrated fabrication with rapid turnaround
- Campaign service for rapid execution
- Continuous review across all orders to bring further cost savings

Getting your repairs in order.

Repair orders are a crucial area of asset integrity. Ongoing operations can give rise to a regular number of repair orders which left unchecked will grow to a significant backlog. 360° Repair Orders is a service set up specifically to target this backlog.

Our dedicated team is challenging and redefining the delivery model for repair orders, combining an enhanced skillset with tailored processes to rapidly eliminate backlog, improve asset integrity and save costs.

We call the service 360° Repair Orders; a continuous review, refine and improve loop.

Fixed and flexible.

We've developed the estimating process, bringing simple fixed cost solutions for a range of standard repairs to improve budget and schedule control. Further savings are achieved through integrated fabrication.

By basing around fixed cost commercials we can:

- Build throughput into a production line
- Combine backlog across contracts
- Provide faster and more reliable solutions
- Reduce costs

From a substantial repair list we can develop a production line to attack your deliverables in the most efficient way possible, the more work we get the more we can drive costs down.

Multi-discipline delivery.

Each individual is a self contained repair order expert, able to survey, design, build and install. This keeps interfaces to a minimum and streamlines the process while drastically reducing personnel on board. We also have the ability to use existing maintenance and construction crews, further reducing costs.

A small team with big assurance.

We've evolved the team specifically to address repair orders. Flexible, agile and dynamic but with the assurance that only comes from being part of a large, well established organisation. Drawing from experience but not restrained by it.

Continuous improvement.

As we continue to build on the service our understanding of each customers requirements and the needs of the asset will be refined further, helping us to become more consistent and predictable. This will help you:

- Stay on schedule
- Keep to budget
- Balance your maintenance routine

Complete end-to-end service.

The team is trained to cover all parts of the process from start to finish, so you don't have to project manage or bring in further specialists.

We can demonstrate significant reductions over the total installed cost of a traditional repair order.

“

The 360° Repair Order team has created an efficient and reliable process. They are delivering an effective service at a much lower cost base.

Falling costs.

The average cost of a repair order has fallen significantly as the process has evolved.

We use a tiering system to select and schedule work by size and scope. This helps us set up a production line to quickly work through similar scopes.

For higher planned volume worksopes we can offer further savings.

Integrated fabrication...

Our goal is to offer a fully integrated, end to end service from survey to signoff. With rapid response personnel we can go from initial survey to design and fabrication in a matter of hours. With every phase fully integrated and multi-skilled personnel we can speed through the process without the usual cross discipline interfaces.

...or modular support.

Our construction team can also execute specific campaign scopes. This service features a self contained workshop solution that can be mobilised to your asset along with industry leading supervision. All permitry and work instructions are created before mobilisation, increasing efficiency and reducing offshore time.

With the introduction of a dedicated repair order team to our service line, Wood Group is breaking long standing industry norms and paving the way to greater efficiency.
