

US Onshore

Full asset life cycle solutions

WOOD GROUP

Engineering & Design

We establish multi-discipline engineering and design teams to meet our customers' needs, ranging from small operational improvements to large engineering and construction projects.

Gathering Systems & Facilities

We offer modular, pre-fabricated and site-specific construction options for a wide range of production facilities.

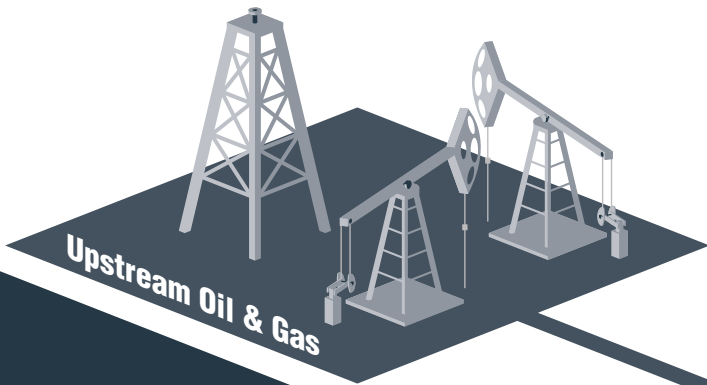

Pipeline Construction & Services

Our construction and inspection services are industry-leading in the safe and efficient installation of a wide range of pipeline projects.

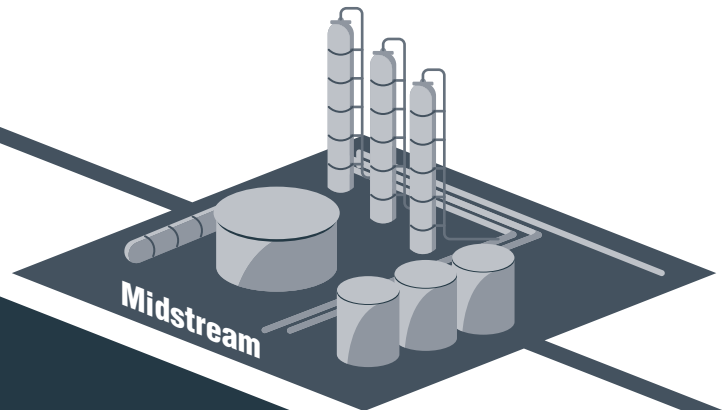

Gas Processing Plant Construction

Our construction performance and safety record of onshore gas plants has led to a significant amount of repeat business.

Saving Costs

Decommission

Wood Group offers single point accountability across the full set of asset life cycle solutions. Our approach delivers a construction-ready design that is based on clearly-defined operability and maintenance requirements. The result is an exceptionally functional facility that will deliver a high level of performance.

Full Asset Support from Coast to Coast

WOOD GROUP

Reimbursable

KPI Driven

Target Price

Lump Sum

Compensation Alignment

We align project risk and reward structures with our customer's business objectives. Available commercial models include but are not limited to: open book reimbursable, KPI-driven, lump-sum turnkey.

Project Maintenance & Operations

We specialize in brownfield and in-plant modifications to a wide range of refineries and chemical processing plants. We also offer comprehensive construction, maintenance and operations support for these facilities.

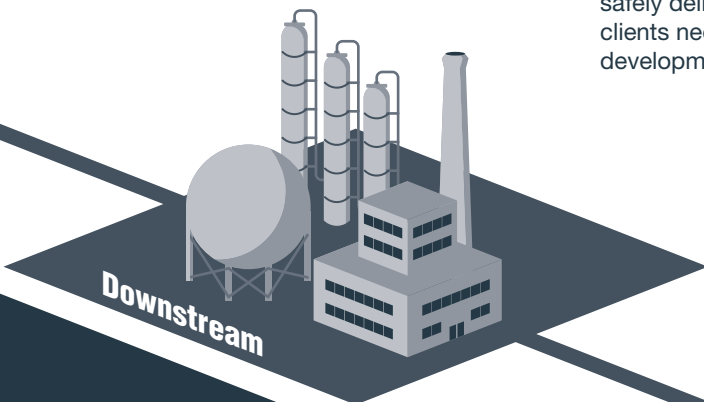

Operations & Maintenance Support Services

We supply contract personnel and consulting services from construction, drilling, production operations to workover and completions. We can safely deliver the expertise that our clients need including training and development programs.

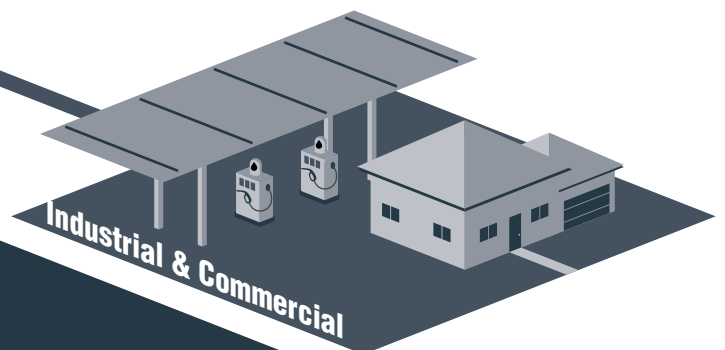

Infrastructure

We deliver a full range of design & construction services for infrastructure on award-winning industrial projects.

Wood Group delivers safe and predictable projects

EVERYONE, EVERYWHERE, EVERY DAY: **SAFE HOME** 

Safety & Assurance is always the number one focus on the job. It is the first and foremost of the Wood Group core values, with the goal of ensuring Everyone, Everywhere, Every Day; Safe Home.

Demonstrable Value in Maintenance and Operations

Production Efficiency – Unconventionals

Our operating improvement plan drove a disciplined approach to lowering operating cost, improving efficiency and optimizing production volumes. The results: a 12% decrease in operating cost per well, a 130% increase in equipment runtime life and a 5% reduction in production decline in the Powder River Basin.

Managed Maintenance Services – Downstream

Our performance improvement plan drove a disciplined approach to mobilization, processes, systems, capital efficiency and governance. The results: a 30% decrease in cost per maintenance work order and an improvement in mechanical availability from bottom to top quartile per the Solomon Index.

12%

Decrease in operating cost per well

Increase in equipment runtime life

130%

We raised our client from 4th quartile to 1st quartile among their peers

Year 4
Year 1

5%

Reduction in production decline

30%

Decrease in cost per maintenance work order
