

## Madrid office

One of the largest E & C contractors in Spain, delivering a full range of services (studies and FEEDs, EPC execution and asset support) for the refining industry, LNG regasification, upstream gas, chemicals, pharmaceuticals and utility power generation.

Wood Iberia has been delivering capital projects in Spain for more than 70 years. Today, Madrid serves as home for both our global E&C group and Industrial Power group operations – and from this office both groups have executed projects both in Spain and around the world.

Our E&C office in Madrid, is Wood's global centre of expertise for LNG import, storage and regasification terminals. It is also recognised as top-tier designer and supplier of our SYDEC<sup>SM</sup> delayed coking technology, as well as a wide range of fired heaters.

The Industrial Power group delivers boilers and heat exchangers on a worldwide basis through its engineering and execution centre in Madrid.

Our product offering includes a complete line of boilers, feedwater heaters and steam condensers for industrial and utility applications, backed by an extensive range of aftermarket services.

### Facilities:

- Madrid office currently accommodates circa 400 employees in a high standard, 15,650 m<sup>2</sup> flexible office layout
