people

50
countries

AA leader rating for
environmental, social and
corporate governance

21% revenue from
sustainable solutions

woodgroup.com

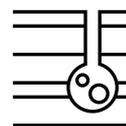

**We help clients design, build and
run complex industrial systems with
precision and care.**

Key Markets:

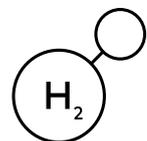

Oil & Gas

Carbon Capture

Hydrogen

Metals & Minerals

Life Sciences

Chemicals

Cross cutting growth drivers:

Digitalisation

Decarbonisation

We work across the full lifecycle of complex industrial systems, trusted by clients as they navigate operational demands today while preparing for a lower-carbon future.

Energy

Wood's technology deployed in 10% of existing hydrogen installed plant base

Engineering the expansion of the world's largest upstream development

Partnering with our client to increase global CCUS capacity by 25%

Safeguarding 25% of the UK domestic gas supply

Materials

Resourcing the energy transition through the delivery of the world's largest copper concentrator

Delivering the world's largest lithium train

Market leader in gold processing and lithium projects

Delivering one of Europe's largest biotech facilities, supporting the provision of essential pharmaceuticals

**Designing. Digitalising.
Decarbonising. Delivering
a sustainable world.**
